

How to play Make Ten:

- 1) Remove the face cards (Jack, Queen, King) from a deck of playing cards and place the rest of the cards face down on a table.
- 2) Each player chooses 2 cards and works out the sum of the two numbers (eg. $2 + 5 = 7$). If the numbers add to 10 that player keeps those cards in front of them.
- 3) Continue playing until all combinations of 10 can be found.
- 4) The player with the most pairs at the end is the winner.

Challenge version:

- 1) Remove the face cards (Jack, Queen, King) from a deck of playing cards and place the deck face down on the table.
- 2) Each player chooses 5 cards and places the cards in front of them.
- 3) The first player uses the 5 cards to try and make a combination of 10. (Eg. If I have 9, 9, 3, 2, 4, I could make $9+4-3=10$ or $9+3-2=10$)
- 4) Whatever cards the player uses to make 10 they keep and refills their hand to 5 cards at the start of each turn.
- 5) Whoever uses the most cards by the end of the deck wins.
